## Professional Summary

Results-driven Data Analyst and Data Scientist with 4+ years of hands-on experience in transforming raw data into actionable insights using Python, SQL, Power BI, and Excel. Proven ability to design dynamic dashboards, automate reporting processes, and drive data-informed decision-making across healthcare, NGO, and tech sectors. Currently enhancing capabilities in machine learning, predictive analytics, and NLP through the Data Science Career Track on DataCamp. Strong communicator skilled in stakeholder engagement, data storytelling, and remote team collaboration.

## Technical Skills

Languages & Tools: Python (Pandas, NumPy, Scikit-learn), SQL, Power BI, Excel, Tableau, R

Techniques: Data Cleaning, Feature Engineering, Machine Learning (Regression, Classification), Text Analysis, Sentiment Analysis, Data Visualization, Dashboard Development, Data Modeling, API Integration, KPI Monitoring

Other: GitHub, Jupyter Notebooks, ETL Processes, UI/UX Visualization Principles

## Soft Skills & Collaboration

Analytical Thinking • Team Collaboration • Communication • Problem-Solving • Stakeholder Engagement • Time Management • Attention to Detail • Remote Work Coordination

## Professional Experience

- Programs Coordinator – Comprehensive Data Analytics Program (CDAP)

HiTech Blitz Consulting Inc. (Canada) | Mar 2025 – Present

- Managed online training schedules and coordinated practical analytics projects.
- Supported candidates in learning Excel, SQL, and Power BI for real-world applications.
- Reviewed candidate feedback and collaborated with trainers to ensure learning impact.
- Helped candidates prepare and showcase data projects via Maven Analytics portfolios.

• Data Analyst Supervisor – Malaria Consortium

Jun 2022 – Oct 2023

- Designed and developed real-time Power BI dashboards to monitor KPIs and visualize risk exposure.
- Applied DAX and Power Query to enhance dashboard performance and data modeling.
- Integrated datasets from Excel and SQL databases for data transformation and reporting.
- Delivered insights to guide strategic decisions and resource planning.

• Project Manager (Data Focus) – Save the Children (ANRIN)

Aug 2021 – Jun 2022

- Automated dashboards for monitoring drug distribution and performance outcomes.
- Integrated multiple data sources and performed detailed analysis aligned with business goals.
- Created interactive visualizations and data models for forecasting and reporting.
- Conducted data training and provided technical support on dashboard usability.

Education

Doctor of Veterinary Medicine – University of Ibadan, 2021

Google Data Analytics Professional Certificate – Coursera

Skills: Data Cleaning, Data Analysis, Data Visualization using Excel, SQL, Tableau

## Professional Development

Certified Data Analyst – DataCamp

Credential ID: DA0022509689479 | Issued April 15, 2025

Skills: Python, SQL, Data Cleaning, Visualization, Statistical Analysis, Communication, Case Study Projects

Verification: [View Certificate](#)

Currently Enrolled – Data Science Career Track (DataCamp)

- Machine Learning Fundamentals (Scikit-learn)
- Text Analytics & Sentiment Analysis
- Data Preprocessing & Feature Engineering
- Recommender Systems & Classification Models
- Python for Data Science & Predictive Modeling
